1. The following is an examiner's statement of reasons for allowance: the amendment filed 8/17/2004 has overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest a switch having a control input and a controlled path with a first terminal connected to said terminal for feeding in the blowing voltage and a second terminal connected to the link, said control input of said switch connected to said output terminal of said output stage and, depending on the first and second input signals, said switch through-connects said first terminal for feeding in the blowing voltage, to said second terminal of said controlled path connected to the link as called for in claim 1. Therefore, claims 1 and 3-10 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
